

LUMISPHERE MULTI LIGHT SYSTEM

GENERAL DESCRIPTION

The Lumisphere Multi Light is a high quality, fully weather-proof system comprising of a flat twin PVC insulated cable on which moulded light units are attached at pre-determined centres providing flexible lighting for a variety of decorative purposes. The lights operate at extra low voltage for safety and efficiency. The system is particularly un-obtrusive when not in use.

The extensive range of Lumisphere weather-proof transformers which provide the power source enable the power to be correctly matched to the number of lights ensuring exceptionally long lamp life.

APPLICATIONS

Coastal promenades - Street and Building Decorations - Theme Parks - Pub and Restaurant Gardens - Swimming pool areas - Car parks etc.

SPECIFICATIONS

Lampholder	Black UV stabilised nylon 66
Cable	Flat twin 1.25mm copper conductors. Black UV stabilised PVC sheath UL105 C rated.
Lamp Cover	Dome shaped, UV stabilised polycarbonate moulding. Screw fit with silicone rubber gasket. Available clear or coloured red, blue, green or amber.
Lamps	12V Wedge base 3w xenon, 12,000 hour average life. 24v Wedge base 3w incandescent 8,000 hour avg. life
Transformers	Type Lumisphere safety isolating WP24 range 80 to 750VA, comply with BS3535 1.0 1990, IEC 742, EN60-742, 1989. IP55
Controllers	Lumisphere Low Voltage Controllers, Flash, shimmer, chase and other patterns. See associated Lumisphere literature or contact technical department.

ORDERING INFORMATION

STANDARD 50 LIGHT 24V SETS

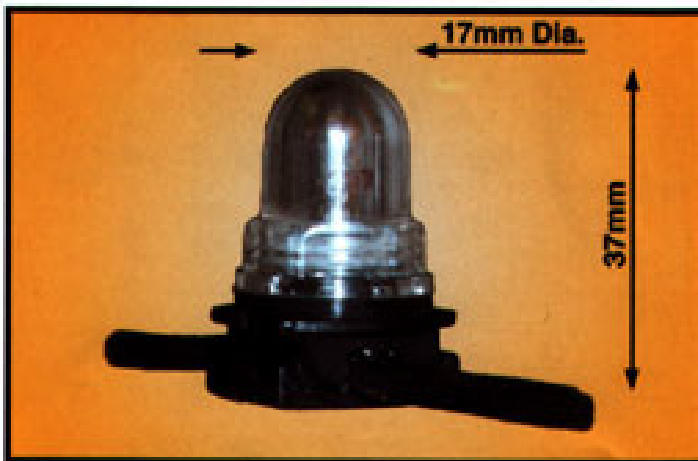

50 X 3W Light units attached at 0.5m centres, 25m +2m lead - Order code ML24/50/05

50 x 3W Light units attached at 0.33m centres, 16.5m + 2m lead - Order code ML24/50/033

50 x 3W light units attached at 0.25m centres, 12.5m + 2m lead - Order code ML24/50/025

CUSTOM MADE FESTOONS

Custom lengths, lamp spacing and coloured covers (red, blue, green and amber) are available to order, please contact sales for further information.
